OpenAlex OQL retrieval (1990–2025)
ES × spatial modelling × climate/environmental change × Global South (affiliation or study area)
n = 9,632 records (articles + reviews)
Cross-validation sources
Google Scholar & Dimensions: recall benchmarking of seed set; no records harvested (see §3.1)
Automated screening
Retracted (−4) → 9,628
Non-journal: repositories/preprints, conference, book series (−587) → 9,041
Non-English (−249) → 8,792
Excluded records
Retracted 4
Non-journal 587
Non-English 249
Σ 840
Source-quality screening
No CWTS-core indexation and not in DOAJ (untracked peer review) (−706) → 8,086
Stop Predatory Journals publisher list matches, 12 publishers (−75) → 8,011
Excluded sources
Untracked peer review 706
Predatory-listed 75
Off-domain primary field (medicine, nursing, arts…) 39
Topical filter (−39) → 7,972
Final analytical corpus
n = 7,972 peer-reviewed journal articles
1,143 journals · 168 countries · 5,150 institutions
Precision (random audit, n = 25): 72–80%
